

Featured Design Scheduler — Admin Walkthrough

Date: July 23, 2026 | Status: VERIFIED & RESOLVED | Author: Team Sienvi

What's new: You can now schedule monthly featured design collections directly from the Admin Dashboard — no code changes needed. Upload images, auto-name them, pick which designs to spotlight, and preview exactly how the homepage will look.

How to Access

1. Log in at /admin
2. Click the **Featured** tab in the dashboard

Figure 1: Featured tab with month selector, headline fields, and upload zone

You'll see four main areas:

- **Month Selector** (top-right) — pick any month to configure
- **Monthly Headline** card — set the title and description
- **Upload New Designs** — drag & drop images, they auto-name from filenames
- **Select Featured Designs** — pick which designs to spotlight

Step 1: Pick Your Designs

Scroll down to the **Select Featured Designs** grid. Click any design thumbnail to select it — selected ones get an orange border and checkmark. The counter badge updates automatically.

Figure 2: Design picker grid with selectable thumbnails

TIP: To upload **new** designs, use the Upload zone above the picker. Filenames auto-convert to titles — for example, `snarky_coffee_cat.png` becomes **Snarky Coffee Cat**.

Step 2: Set Headline & Subheadline

Fill in the **Headline** (shows as the big title on the homepage) and **Subheadline** (the description below it). Keep the **Active** checkbox checked so it goes live when the month arrives.

Figure 3: Filled form with headline, subheadline, and selected designs

Step 3: Preview

Click the **Preview** button (top-right, next to Save) to see exactly how the featured section will look on the homepage.

Figure 4: Live preview of the homepage featured section

The preview shows:

- Your headline and subheadline
- Theme badges (if you added any)
- The selected designs in a grid with 'FEATURED' badges

Step 4: Save

Click **Save** — you'll see a success confirmation. The schedule is now stored and will automatically display on the homepage when that month arrives.

Quick Reference

Action	How
Switch month	Use the month dropdown (top-right)
Upload new designs	Drag images into the Upload zone
Select/deselect a design	Click its thumbnail
Add SEO theme badges	Use the Theme Badges section (label + keywords)
Preview homepage look	Click the Preview button
Save changes	Click Save
Deactivate a month	Uncheck the 'Active' checkbox

NOTE: If no schedule is saved for a month, the homepage automatically falls back to the default built-in themes — nothing breaks.
