

Admin Standard Operating Procedure (SOP)

Version: 2.0 | Effective Date: August 2026 | Authorized Audience: Platform & Community Administrators

1. Purpose & Scope

This Standard Operating Procedure (SOP) outlines the mandatory workflows for system administrators managing the **Snarky Humans Storefront** (featured designs & holiday schedules) and the **PlayIQ LMS Platform** (dispatching onboarding invitations, waiver promo codes, and attached setup guides to beta testers).

2. SOP-01: Updating Featured Designs & Monthly Schedules (Snarky Humans)

Follow these instructions to schedule or replace the featured designs displayed on the storefront homepage.

Step	Action / Procedure	Admin Controls & Notes
1.1	Access Admin Dashboard Navigate to /admin/dashboard or /admin. Sign in using authorized admin credentials (teamsienvi@gmail.com).	Requires role authorization in Supabase auth schema.
1.2	Select Target Month Open the Featured Design Scheduler tab. Choose the target month from the dropdown (e.g. Month 7: August / Q3 Showcase).	System loads existing headline, theme keywords, and currently featured design IDs.
1.3	Select / Reorder Featured Designs Toggle the checkboxes on the design catalog cards you want to spotlight (recommended 4 to 8 designs).	Designs with event keyword matches (e.g. Labor Day, Grandparents Day) automatically show event badges.
1.4	Save Schedule to Database Click the green Save Schedule button. Confirm the success toast notification appears.	Updates public.featured_schedules in Supabase in real-time.
1.5	Verify Storefront Live View Visit the public homepage (/). Verify the Featured Designs section immediately renders the newly scheduled designs.	Fallback Hierarchy: Admin Scheduled > Q3 Event Match > First 8 Active.

Important Guardrail: Temporarily hidden designs (e.g., 'Adulting Is Hard', 'World Takes All the Credit', 'CEOs of Chaos', 'Snacks Are Currency') are globally filtered via src/lib/designConstants.ts and will not be displayed in shop grids.

3. SOP-02: Dispatching Beta Tester Welcome & Setup Guide (PlayIQ)

Administrators can dispatch complete onboarding packages—including the branded welcome letter, beta fee waiver promo code, and the 6-page Parent_Setup_Guide.pdf attachment—directly from the PlayIQ Admin Dashboard using Amazon SES.

Method A: 1-Click Send for Registered Applicants in Cohort Table

1. Navigate to **Admin Home** at /admin/home.
2. Scroll down to the **Cohort Manifest Table** (COHORT_TABLE_MANIFEST).
3. Locate the applicant row (filter by *Paid*, *Started*, *Promo*, or *All*).
4. Click the blue **Send Guide** button in the **Action** column.
5. The system automatically pulls the parent's email, parent name, and linked student name, and attaches Parent_Setup_Guide.pdf. A green **Sent!** badge confirms delivery.

Method B: Quick Dispatch Modal for New / External Beta Testers

1. In /admin/home, click the purple + **Dispatch Beta Email** button above the table.
2. Enter the **Recipient Email** (e.g., mystiquen21@gmail.com).
3. Enter the **Parent Name** (e.g., *Mystique*) and optional **Student Name** (e.g., *Lyric*).
4. Verify the **Promo / Waiver Code** (defaults to PLAYIQ2025).
5. Click **Send Beta Package**. Live status updates will confirm delivery and display the Amazon SES Message ID.

4. Beta Tester Package Reference & Defaults

Item	Specification / Content
Email Sender	"WePlayIQ" <sender@weplayiq.com> (via Amazon SES us-east-1)
Reply-To Address	support@weplayiq.com
Default Promo Code	PLAYIQ2025 (Waives all enrollment & platform onboarding fees)
Attached Guide	public/Parent_Setup_Guide.pdf (Visual walkthrough of pilot application, provisioning, and teen login)
Parent Access URL	https://weplayiq.com → Click " <i>Apply for Pilot Access</i> "
Student Login URL	https://weplayiq.com/login → Select <i>Student</i> tab (no student email needed)

5. Troubleshooting & Admin Escalation

Issue Observed	Root Cause	Remediation Step
Email shows <i>Retry</i> error	Invalid email syntax or AWS SES sandbox unverified address.	Check recipient email spelling. Verify sending domain in AWS SES console.
Parent cannot provision teen	Parent has not registered / completed application form.	Instruct parent to visit weplayiq.com and apply with code PLAYIQ2025.
Featured schedule not updating	Admin session expired or network timeout.	Refresh /admin/dashboard, re-authenticate, and click <i>Save Schedule</i> again.
