

# Snarky Humans — Featured Design Scheduling SOP

Standard Operating Procedure: Storefront Curation & Monthly Event Scheduling | Version: 2.1 | Role: Store Administrator

## 1. Purpose & Operational Overview

The **Featured Designs** section on the Snarky Humans homepage (/) is the primary merchandising showcase. This SOP guides administrators on how to curate, spotlight, and schedule monthly holiday and seasonal design collections (e.g., Labor Day, Grandparents Day, Halloween, Holiday Gift Guides) using the internal Admin Scheduler.

## 2. Step-by-Step Scheduling Workflow

| Step # | Operational Action                                                                                                                                                                                       | Admin Controls & System Behavior                                                                                        |
|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Step 1 | <b>Sign in to Admin Dashboard</b><br>Navigate to /admin/dashboard (or /admin). Log in with your admin credentials (teamsienvi@gmail.com).                                                                | Requires authorized admin role. Directs to the management control center.                                               |
| Step 2 | <b>Open Featured Schedule Tab</b><br>Click on the <b>Featured Design Scheduler</b> section in the navigation menu.                                                                                       | Displays the calendar month selector and the full design library.                                                       |
| Step 3 | <b>Select Target Calendar Month</b><br>Use the Month dropdown to pick the upcoming or active month (e.g. <i>Month 7: August</i> , <i>Month 8: September</i> , etc.).                                     | The dashboard automatically fetches existing headlines, theme tags, and active design IDs for that month from Supabase. |
| Step 4 | <b>Configure Headline &amp; Event Themes</b><br>Review or edit the showcase <b>Headline</b> , <b>Subheadline</b> , and <b>Theme Badges</b> (e.g. <i>[Labor Day Snark]</i> , <i>[Grandparents Day]</i> ). | These headlines appear dynamically at the top of the homepage Featured section.                                         |
| Step 5 | <b>Select &amp; Toggle Featured Designs</b><br>Scroll through the design catalog grid. Check the checkbox on each design card you wish to spotlight. Recommended count: <b>4 to 8 designs</b> .          | Selected cards show an orange active border. Event-tagged items automatically receive matching promotional badges.      |
| Step 6 | <b>Save Schedule to Database</b><br>Click the green <b>Save Schedule</b> button at the bottom of the scheduler.                                                                                          | Commits changes to public.featured_schedules in Supabase. A green confirmation toast will appear.                       |
| Step 7 | <b>Verify Storefront Live View</b><br>Open the public homepage (/). Verify the Featured Designs carousel displays your chosen designs and correct event badges.                                          | Public visitors receive the updated roster in real-time without requiring a website rebuild.                            |

3. Merchandising Priority Cascade (Storefront Display Logic)

To ensure the homepage never displays an empty section or broken state, ProductGrid.tsx enforces a strict 3-tier priority sequence:

| Priority Level                  | Source / Mechanism                                                                                | Trigger Condition                                                            |
|---------------------------------|---------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|
| 1. Admin Scheduled (Highest)    | Active featured_schedules record in Supabase for current month.                                   | Admin has explicitly saved a design selection for the active calendar month. |
| 2. Seasonal Event Fallback      | Automatic keyword / tag matching (e.g. Q3: Labor Day, Grandparents Day, 9/11, Hispanic Heritage). | No admin schedule is saved, but seasonal event designs exist in the catalog. |
| 3. Catalog Default (Safety Net) | First 8 active designs in the catalog database.                                                   | Fallback when neither an admin schedule nor event tags are matched.          |

4. Hidden & Excluded Design Guardrails

Certain designs are intentionally excluded from active storefront grids (including non-featured holiday variants, out-of-season products, and placeholder mockups). These are centrally governed in src/lib/designConstants.ts:

**Protected Exclusion Patterns:**

- *Non-Featured Labor Day:* 'World Takes All the Credit', 'Fueled by Caffeine & Deadlines', 'Deserves More Than a Holiday', 'Adulting Is Hard'
- *Seasonal / Internal Placeholders:* 'Just Here for the Ice Cream', 'Red, White & Scoops', 'CEOs of Chaos', 'World's Okayest Parent', 'Powered by Love', 'Snacks Are Currency', 'Raising Humans Is Exhausting', 'Snarky Humans'
- *Rule:* If an admin checks an excluded design in the scheduler, it will automatically remain hidden from public browsing grids until removed from the exclusion list.

5. Active August 2026 Event Showcase Reference

| Design ID                            | Event / Collection Theme                    | Display Status  |
|--------------------------------------|---------------------------------------------|-----------------|
| 06f3fc3f-bb59-46b5-b603-44c31150d707 | Labor Day — Work & Attitude Humor           | Live & Featured |
| d036dfc5-6d3c-423f-bfee-1012b8c25ac8 | Grandparents Day — Professional Spoilers    | Live & Featured |
| 446fe0b3-b4d3-4f8d-a795-cb97387c19d8 | 9/11 Patriot Day — Remembrance & Honor      | Live & Featured |
| 8817bdc3-4029-4e4d-96e9-575bf12887be | Hispanic Heritage Month — Orgullo & Cultura | Live & Featured |
| 4699aa27-6f14-4c9a-8456-6f1a6b445104 | Bestseller — Core Brand Humor               | Live & Featured |

6. Administrator Troubleshooting & Quick Reference

| Scenario                                  | Cause & Remediation                                                                                                            |
|-------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| New schedule not visible on homepage      | Browser cache or CDN edge cache. Do a hard refresh (Ctrl+F5 or Cmd+Shift+R). Verify Supabase database updated successfully.    |
| Save button does not respond              | Admin authentication session has expired. Log out and re-authenticate at /admin/dashboard with teamsienvi@gmail.com.           |
| Design checkbox is disabled or greyed out | The design is marked is_active = false in the main product catalog. Re-enable the product before adding to featured schedules. |
